### DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 12/26/06.  
Accordingly, claim 1 is currently pending; and claims 2-25 are canceled.

### EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### IN THE ABSTRACT:

-On line 5, the phrase "a variety of means" is changed to --a variety of devices--.

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure

sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

#### REASONS FOR ALLOWANCE

4. Claim 1 is allowed.

5. The following is an examiner's statement of reasons for allowance:

–Regarding to claim 1, none of prior art of record teaches or suggests an automatic lockout system, as claimed, wherein the system comprises a portable communication device; an accessory for receiving the portable communication device; a unique ID stored in the accessory, the unique ID associated with a predetermined user configuration, the portable communication device reading the unique ID from the accessory and assuming the predetermined configuration associated with that ID; a plurality of reed switches embedded in the device; and an array of magnets embedded in the accessory for aligning

and mating with at least one of the plurality of reed switches forming a predetermined pattern corresponding to the unique ID.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
